

## 1. Description

### 1.1. Project

|                 |                    |
|-----------------|--------------------|
| Project Name    | MAX30100_test_01   |
| Board Name      | MAX30100_test_01   |
| Generated with: | STM32CubeMX 4.22.0 |
| Date            | 11/03/2017         |

### 1.2. MCU

|                |               |
|----------------|---------------|
| MCU Series     | STM32F1       |
| MCU Line       | STM32F103     |
| MCU name       | STM32F103ZETx |
| MCU Package    | LQFP144       |
| MCU Pin number | 144           |

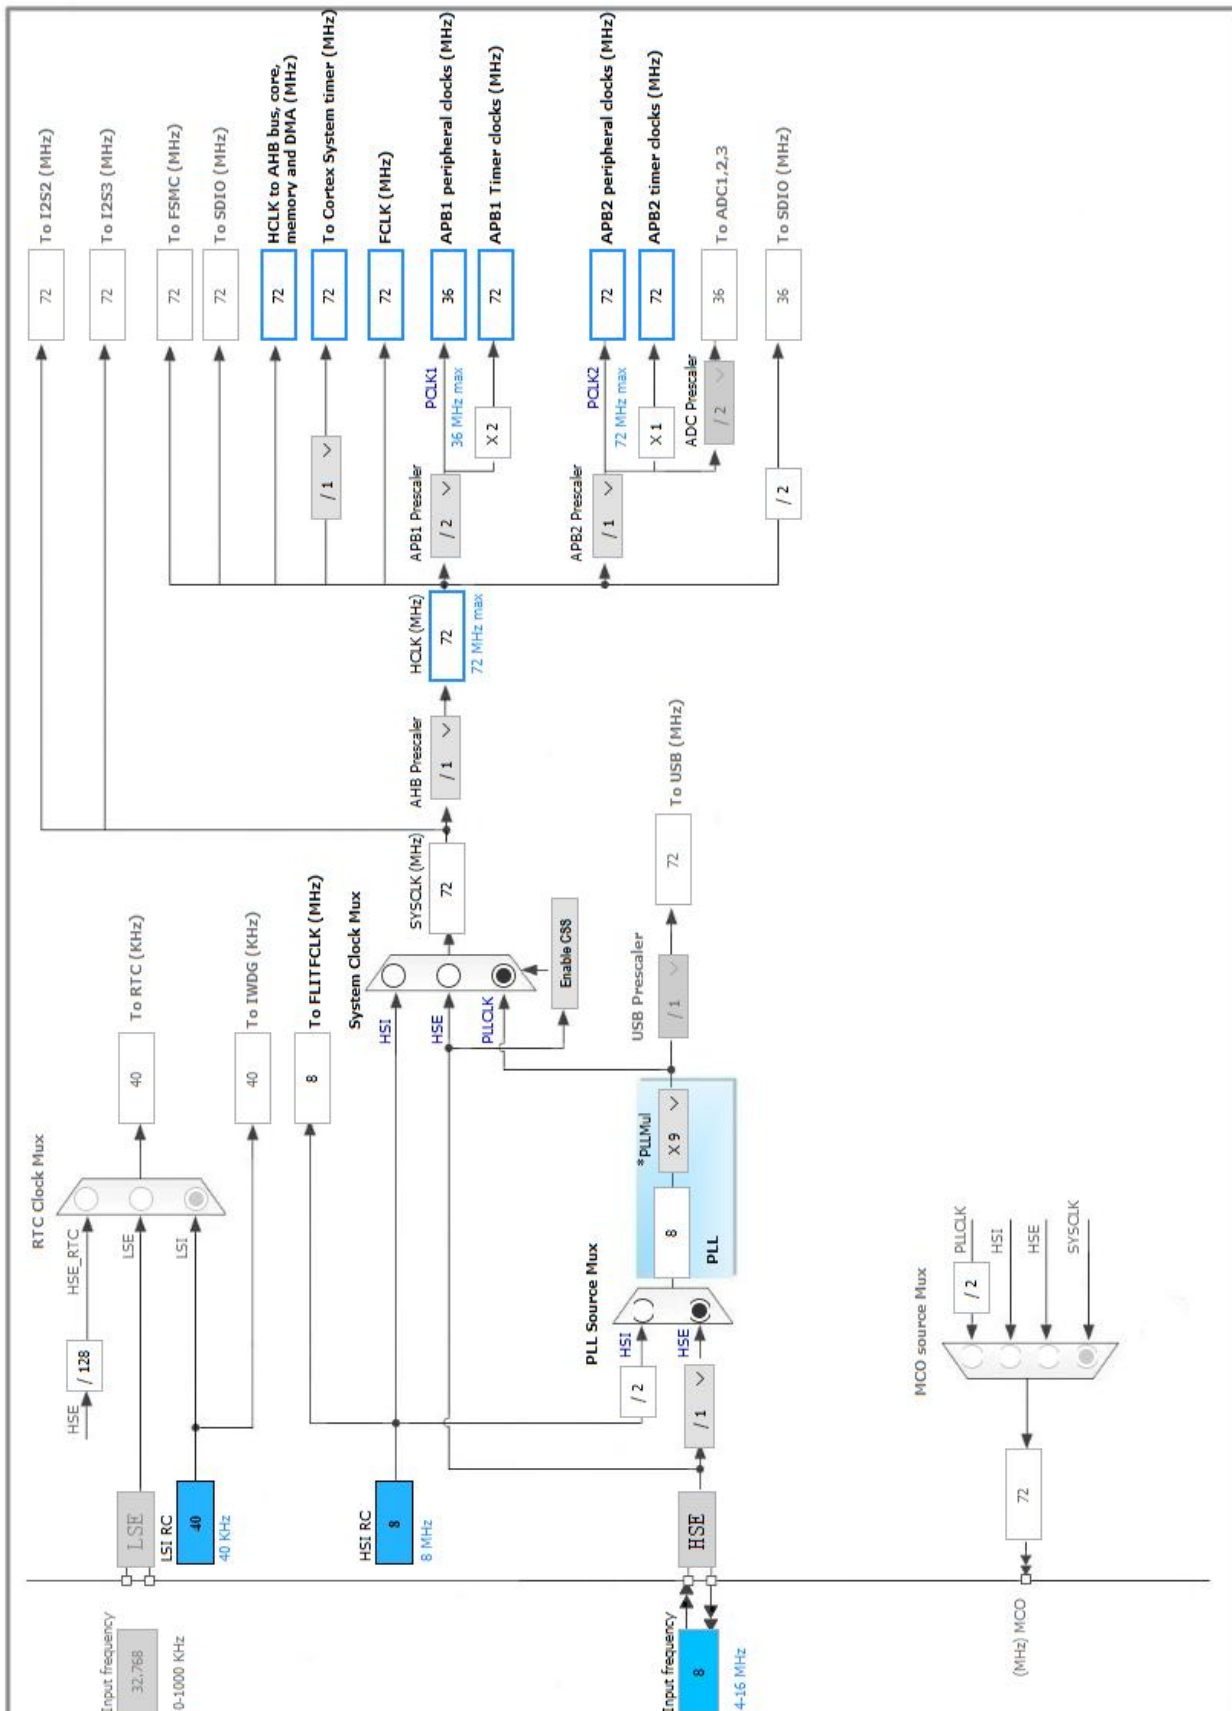

## 2. Pinout Configuration

### 3. Pins Configuration

| Pin Number<br>LQFP144 | Pin Name<br>(function after<br>reset) | Pin Type | Alternate<br>Function(s) | Label |
|-----------------------|---------------------------------------|----------|--------------------------|-------|
| 6                     | VBAT                                  | Power    |                          |       |
| 16                    | VSS                                   | Power    |                          |       |
| 17                    | VDD                                   | Power    |                          |       |
| 23                    | OSC_IN                                | I/O      | RCC_OSC_IN               |       |
| 24                    | OSC_OUT                               | I/O      | RCC_OSC_OUT              |       |
| 25                    | NRST                                  | Reset    |                          |       |
| 30                    | VSSA                                  | Power    |                          |       |
| 31                    | VREF-                                 | Power    |                          |       |
| 32                    | VREF+                                 | Power    |                          |       |
| 33                    | VDDA                                  | Power    |                          |       |
| 38                    | VSS                                   | Power    |                          |       |
| 39                    | VDD                                   | Power    |                          |       |
| 51                    | VSS                                   | Power    |                          |       |
| 52                    | VDD                                   | Power    |                          |       |
| 61                    | VSS                                   | Power    |                          |       |
| 62                    | VDD                                   | Power    |                          |       |
| 71                    | VSS                                   | Power    |                          |       |
| 72                    | VDD                                   | Power    |                          |       |
| 83                    | VSS                                   | Power    |                          |       |
| 84                    | VDD                                   | Power    |                          |       |
| 94                    | VSS                                   | Power    |                          |       |
| 95                    | VDD                                   | Power    |                          |       |
| 101                   | PA9                                   | I/O      | USART1_TX                |       |
| 102                   | PA10                                  | I/O      | USART1_RX                |       |
| 106                   | NC                                    | NC       |                          |       |
| 107                   | VSS                                   | Power    |                          |       |
| 108                   | VDD                                   | Power    |                          |       |
| 120                   | VSS                                   | Power    |                          |       |
| 121                   | VDD                                   | Power    |                          |       |
| 130                   | VSS                                   | Power    |                          |       |
| 131                   | VDD                                   | Power    |                          |       |
| 136                   | PB6                                   | I/O      | I2C1_SCL                 |       |
| 137                   | PB7                                   | I/O      | I2C1_SDA                 |       |
| 138                   | BOOT0                                 | Boot     |                          |       |
| 143                   | VSS                                   | Power    |                          |       |
| 144                   | VDD                                   | Power    |                          |       |

## 4. Clock Tree Configuration

## 5. IPs and Middleware Configuration

### 5.1. I2C1

#### I2C: I2C

##### 5.1.1. Parameter Settings:

###### Master Features:

|                      |               |
|----------------------|---------------|
| I2C Speed Mode       | Standard Mode |
| I2C Clock Speed (Hz) | 100000        |

###### Slave Features:

|                                  |          |
|----------------------------------|----------|
| Clock No Stretch Mode            | Disabled |
| Primary Address Length selection | 7-bit    |
| Dual Address Acknowledged        | Disabled |
| Primary slave address            | 0        |
| General Call address detection   | Disabled |

### 5.2. RCC

#### High Speed Clock (HSE): Crystal/Ceramic Resonator

##### 5.2.1. Parameter Settings:

###### System Parameters:

|                   |                    |
|-------------------|--------------------|
| VDD voltage (V)   | 3.3                |
| Prefetch Buffer   | Enabled            |
| Flash Latency(WS) | 2 WS (3 CPU cycle) |

###### RCC Parameters:

|                                |      |
|--------------------------------|------|
| HSI Calibration Value          | 16   |
| HSE Startup Timeout Value (ms) | 100  |
| LSE Startup Timeout Value (ms) | 5000 |

### 5.3. SYS

#### Debug: No Debug

**Timebase Source: SysTick**

## **5.4. USART1**

**Mode: Asynchronous**

### **5.4.1. Parameter Settings:**

#### **Basic Parameters:**

|             |                           |
|-------------|---------------------------|
| Baud Rate   | 115200                    |
| Word Length | 8 Bits (including Parity) |
| Parity      | None                      |
| Stop Bits   | 1                         |

#### **Advanced Parameters:**

|                |                      |
|----------------|----------------------|
| Data Direction | Receive and Transmit |
| Over Sampling  | 16 Samples           |

**\* User modified value**

## 6. System Configuration

### 6.1. GPIO configuration

| IP     | Pin     | Signal      | GPIO mode                     | GPIO pull/up pull down      | Max Speed     | User Label |
|--------|---------|-------------|-------------------------------|-----------------------------|---------------|------------|
| I2C1   | PB6     | I2C1_SCL    | Alternate Function Open Drain | n/a                         | <b>High *</b> |            |
|        | PB7     | I2C1_SDA    | Alternate Function Open Drain | n/a                         | <b>High *</b> |            |
| RCC    | OSC_IN  | RCC_OSC_IN  | n/a                           | n/a                         | n/a           |            |
|        | OSC_OUT | RCC_OSC_OUT | n/a                           | n/a                         | n/a           |            |
| USART1 | PA9     | USART1_TX   | Alternate Function Push Pull  | n/a                         | <b>High *</b> |            |
|        | PA10    | USART1_RX   | Input mode                    | No pull-up and no pull-down | <b>n/a</b>    |            |

### 6.2. DMA configuration

nothing configured in DMA service

### 6.3. NVIC configuration

| Interrupt Table                         | Enable | Preenmption Priority | SubPriority |
|---|--------|----------------------|-------------|
| Non maskable interrupt                  | true   | 0                    | 0           |
| Hard fault interrupt                    | true   | 0                    | 0           |
| Memory management fault                 | true   | 0                    | 0           |
| Prefetch fault, memory access fault     | true   | 0                    | 0           |
| Undefined instruction or illegal state  | true   | 0                    | 0           |
| System service call via SWI instruction | true   | 0                    | 0           |
| Debug monitor                           | true   | 0                    | 0           |
| Pendable request for system service     | true   | 0                    | 0           |
| System tick timer                       | true   | 0                    | 0           |
| PVD interrupt through EXTI line 16      | unused |                      |             |
| Flash global interrupt                  | unused |                      |             |
| RCC global interrupt                    | unused |                      |             |
| I2C1 event interrupt                    | unused |                      |             |
| I2C1 error interrupt                    | unused |                      |             |
| USART1 global interrupt                 | unused |                      |             |

## ***7. Power Consumption Calculator report***

### 7.1. Microcontroller Selection

|           |               |
|-----------|---------------|
| Series    | STM32F1       |
| Line      | STM32F103     |
| MCU       | STM32F103ZETx |
| Datasheet | 14611_Rev12   |

### 7.2. Parameter Selection

|             |     |
|-------------|-----|
| Temperature | 25  |
| Vdd         | 3.3 |

## 8. Software Project

### 8.1. Project Settings

| Name                              | Value                             |
|-----------------------------------|-----------------------------------|
| Project Name                      | MAX30100_test_01                  |
| Project Folder                    | E:\STM32F103ZET6\MAX30100_test_01 |
| Toolchain / IDE                   | MDK-ARM V5                        |
| Firmware Package Name and Version | STM32Cube FW_F1 V1.6.0            |

### 8.2. Code Generation Settings

| Name  | Value                                 |
|---|---------------------------------------|
| STM32Cube Firmware Library Package                              | Copy only the necessary library files |
| Generate peripheral initialization as a pair of '.c/.h' files   | Yes                                   |
| Backup previously generated files when re-generating            | No                                    |
| Delete previously generated files when not re-generated         | Yes                                   |
| Set all free pins as analog (to optimize the power consumption) | No                                    |
